ROTTEN CONDITIONS CAUSE SERIOUS SMASH-UP

A defective switch, on which there was no lock nor spikes to hold it in place, caused the probable fatal injury of two persons yesterday and serious injuries to 12 others when a Chicago, Milwaukee & St. Paul freight train crashed into a Northwestern "L" train near Ardmore avenue.

The trains were running parallel. When the all-steel railroad train came to a temporary switch its heavy pounding opened the switch and it crashed through tearing a hole in the wooden "L" car.

Mrs. Helen M. Johnson, 1434 Hinman avenue, Evanston, and Flora Loftus, 21, 6934 Sheridan road, may die.

Feeling was high among the survivors. They were loud in their condemnation of the railroad company and the "L" company.

Lawrence Ferguson, president of the Ferguson Coal Co., said that before the accident he and several other men had criticized the switch as a dangerous piece of work.

The Illinois public utilities commission is investigating the wreck.
